General Agency of Specialized Inspection

Issues of concern

To Mongolian agency of standardization and metrology :

1. Standards such as "Plastic package for the food products" General technical requirement MNS 1010:1986; "Polymeric packaging for food products" General technical requirement MNS 5547:2005; "Procedure for packaging, storage and transportation of dairy products" MNS 3179:1981" need to be promptly updated.

To aimag, capital city, soum and district governors:

1. To designate in their respective territories, a place where used chemicals containers, packages, considered as hazardous waste materials, are collected, temporarily stored, and disposed of, in accordance with relevant law;

General Agency of Specialized Inspection

Issues of concern

2. In accordance with paragraph 3.5.4 of Procedure for storing, transportation, handling and destruction of chemical and hazardous materials, stating that "Household use of chemicals and hazardous materials containers and packages is prohibited", to ban the import of new and/or used non-food plastic containers, and use, particularly, in food trades, services, foodservice establishments, schools, kindergartens and hospitals. Oversee enforcement of this procedure;

3. In collaboration with public and civil society organizations , conduct awareness raising campaign on no use of non-food plastic containers for food storage, including adverse health impacts of plastic containers use, among general public;

4. Encourage food markets and shopping centers to employ internal mechanism to control the use of non-food plastic containers in their premises;
